

FARM BIOSECURITY

MEMBER BIOSECURITY PROGRAM

Tablelands Farming Systems
PO Box 791
Goulburn NSW 2580

FACT SHEET

Tablelands Farming Systems and Graham Centre Partnership Project

Supporting livestock producers managing animal health and biosecurity on the NSW Southern Tablelands

The program provides a 4-step process for members to follow to address biosecurity compliance requirements:

STEP 1

Attend Training

Training Sessions provide members with an introduction to biosecurity - Biosecurity Basics - and more detailed information and tools - Biosecurity Planning (training materials can be downloaded)

STEP 2

Review Farm or Region Report

External Analysis by the Graham Centre provides observations on farm-specific and region-specific biosecurity considerations (print your farm-specific report or download the region-specific report)

STEP 3

Update Action Plan Template or App with regard to your enterprise type and the farm or region-specific report

Complete Biosecurity Action Plan using either:

- The template created by Livestock Production Assurance for Meat and Livestock Australia
- The Action Planner created by FarmBiosecurity for Animal Health Australia and Plant Health Australia
- The App created by FarmBiosecurity for Animal Health Australia and Plant Health Australia

STEP 4

Record, review and update – as required

Create your Biosecurity Record by completing the program cover sheet, and placing it in the folder provided with your report and completed template - **Review** and update your plan as the need arises, recording the revisions on the Program Cover Sheet
