

Seasonal Update - Beef

South East Local Land Services

With wet conditions underfoot and a strong chance of above average spring rainfall, all the signs are pointing towards another strong finish to the year.

History tells us however that big springs don't always generate big returns from our livestock.

In this webinar, Matt Lieschke (Agriculture Advisor, Local Land Services) and industry consultant Jeff House (Jeff House Livestock) will talk through some of the tools and strategies to get the most out of this spring.

Alex Stephens (LLS District Vet) will also discuss animal health issues.

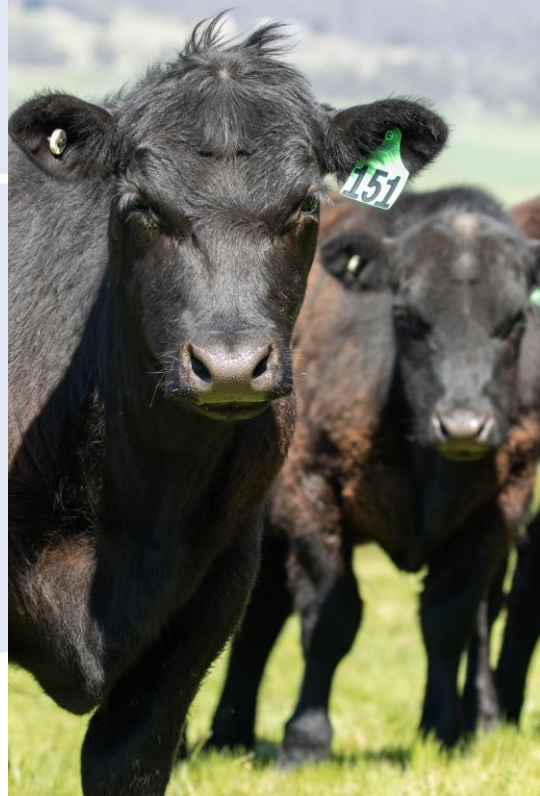

- Managing pasture quality to maximise livestock performance
- Marketing options – what are the feedlots and processors doing?
- Animal health update – what are some of the things to watch out for?

When

Monday 13 September 2021
1.00pm – 2.30pm (via webinar)
